# FIRST DISCOVERY

Arctic Star recently found 111 diamonds in 48.65kg of a kimberlite core sample on its Timantti Project in Finland.

SRC CAUSTIC FUSION MICRODIAMOND RESULTS

# ACQUISITION OF RIGHTS

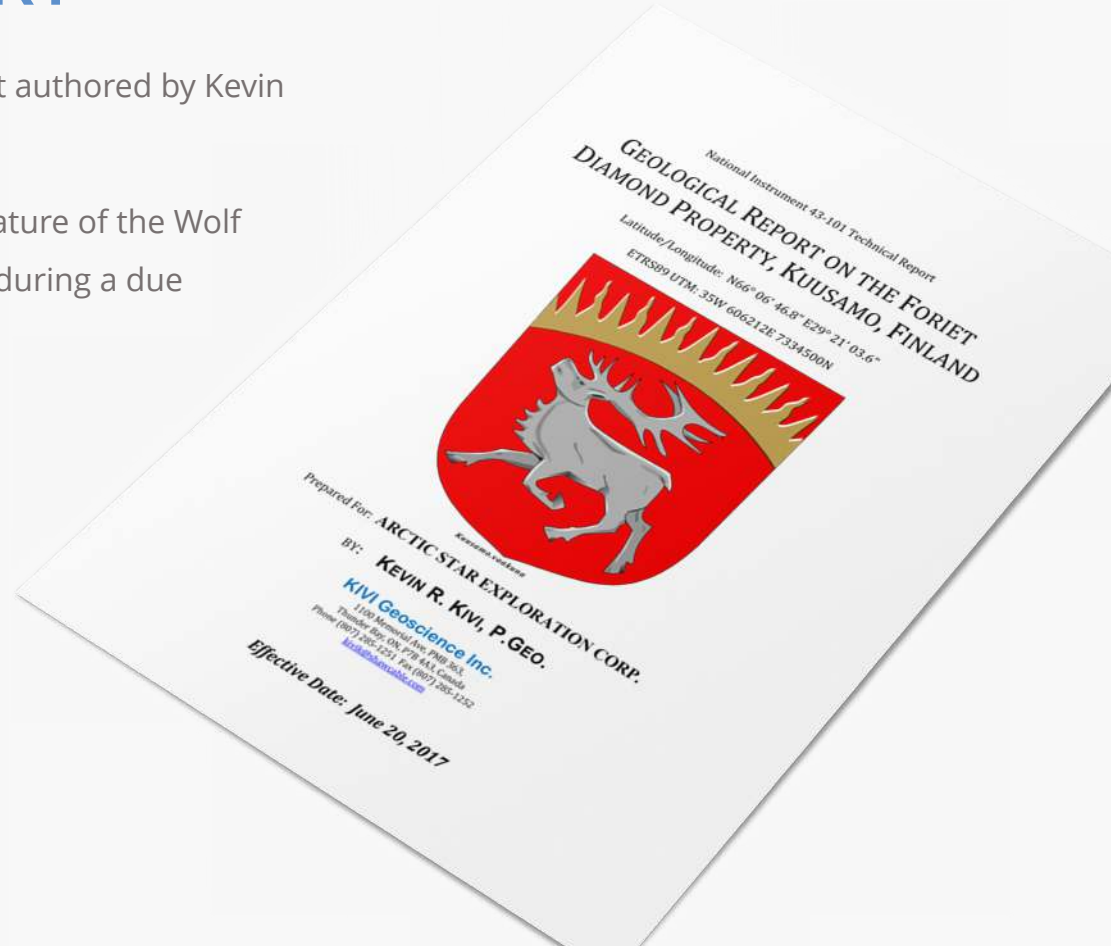

Arctic Star will acquire 100% of 243 hectares around the 2 diamondiferous Black Wolf and White Wolf kimberlites in northeastern Finland. The Wolf kimberlites occur near the world class Lomonosov and Grib diamond mines, in nearby Russia.

# GEOLOGICAL REPORT

Arctic Star has filed a 43-101 technical report authored by Kevin R. Kivi (P.Geo.) of KIVI Geoscience Inc.

The report confirms the diamond-bearing nature of the Wolf kimberlites by submitted samples collected during a due diligence site visit.

**GRIB MINE**

## PROVEN TRACK RECORD

Roy Spencer discovered the multi-billion-dollar Grib Kimberlites in Russia with estimated reserves of 98.5 million carats of diamonds

**DIAVIK MINE**

Buddy Doyle led the team that found the Diavik diamond deposits in Canada which produced 6.6 million carats of diamonds in 2016

# ANALYSIS OF DIAMOND MARKET

“We expect demand for rough diamonds to recover from the recent downturn and return to a long-term growth trajectory of about 2% to 5% per year on average”

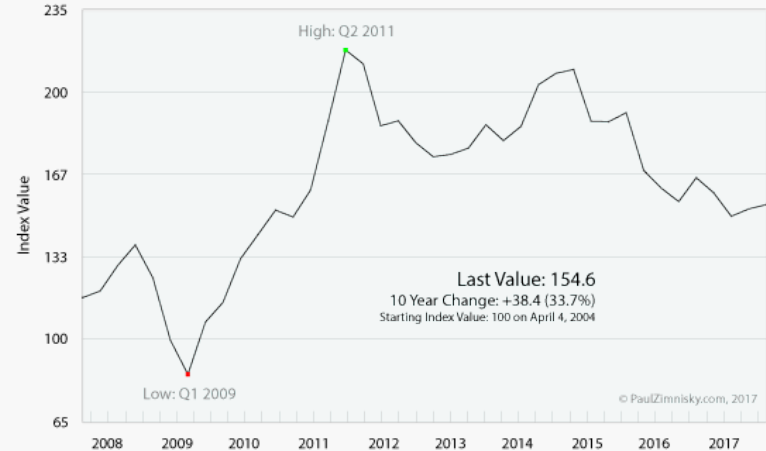

*The Global Diamond Industry 2016,*  
Bain & Company

“The fundamental supply and demand trends of the diamond industry continue to be positive... the diamond industry can anticipate a positive future”

*2016 Diamond Industry Outlook,* De Beers
